

A

If a couple are going to have sex, who needs to agree?

They agree to keep themselves safe and use a condom. What will this protect them against?

What other decisions do they need to make?

E

Inside out - can you get it wrong?

How can you check?

What do you squeeze ?

B

Why not just flush it down the toilet?

Wrap it in a tissue – Where should the condom end up?

C

The date is fine and it has the kite mark. What clues could there be on the packet that a condom is not suitable for use?

(Check the picture for ideas)

F

Why is the penis still erect in this picture?

Where is the sperm?

What could happen if the condom is not held in place when pulling out?

D

When does this happen?

Why is the condom squashed to the bottom of the packet?

Greasy fingers, sharp teeth and nails are hazardous – explain why.

Who gets it out of the foil?
